

Built to grow with you.

One platform connecting your back office,
your field team, and your customers.
From first job to final invoice.

Most service businesses don't fail on the big jobs. They fail in the gaps.

The engineer who didn't get the updated job sheet. The invoice that waited three days because the office was chasing paperwork. Add those up across a year and you have a margin problem you can't ignore and a growth ceiling you can't break through.

This is the cost of disconnected systems.

One platform handles all of that.

End-to-end operations

The quote, the job, the certificate, the invoice, all in one place. No handoffs lost between systems. No paperwork to chase.

Clear data, clear decisions

Real-time dashboards and reporting give you the visibility to act while it still matters, not after the month-end report.

Support you can lean on

A dedicated account manager who knows your business, picks up the phone, and stays with you long after go-live.

Field teams, supported

Everything an engineer needs before they arrive on site. Works offline, captures signatures, logs updates in real time.

"We've slashed job-related man-hours by 50% with Joblogic. Every job is now monitored, processed, updated, and invoiced in half the time."

Barry Russell
General Manager
RDA Service & Installation

Joblogic in numbers: The important bits

25+

Years

7000+

Businesses

45,000+

Engineers

How it works

From first call to final invoice.

Jobs come in, engineers are scheduled, work is carried out, compliance is captured, and invoices go out. One connected flow from the first call to the moment cash hits your account.

Job comes in

**Right engineer
dispatched**

**Engineer
arrives prepared**

**Work done,
site compliance met**

**Invoice raised
automatically**

**Cash in
your account**

Without Joblogic

- ✗ Manual job allocation
- ✗ Paper forms, lost certificates
- ✗ Chasing engineers for updates
- ✗ Invoicing errors from manual entry
- ✗ No field visibility
- ✗ Compliance gaps at audit

With Joblogic

- ✓ Automated scheduling
- ✓ Digital forms, real-time sync
- ✓ Invoices raised automatically
- ✓ Full field visibility in real time
- ✓ Live job tracking
- ✓ Automated compliance alerts

The platform

Everything your operation needs, built in.

Built over 25 years alongside service businesses. Every feature exists because someone needed it.

"Using the route scheduler and the SFG function to allocate time for jobs, we've calculated we're going to be saving upwards of 5,000 hours of working time in the next PPM year."

George Smith
UK National

Reporting & dashboards

Real-time KPI dashboards,
SLA performance tracking,
& financial reporting.
Your entire operation,
ready to view.

Asset & PPM management

A complete asset register
with planned maintenance
schedules and automated
compliance alerts. Nothing
missed, nothing overdue.

Invoicing & finance

Quotes and invoices raised
automatically from job records.
Integrates with Xero, Sage,
and QuickBooks.

Mobile engineer app

Works offline. Captures
signatures, photos,
risk assessments,
and certificates on site.

Customer portal

Give your customers the
same insight as you.
Job status, certificates,
and history, without
them having to ask.

Intelligent scheduling

Drag-and-drop scheduling
with skills-based matching,
SLA tracking, and
automated job allocation.
Once hours, now minutes.

Where Joblogic is heading - *joblogic.ai*

Field service has always been reactive. The next phase is different.

A job comes in. Someone checks availability. Someone dispatches. Someone chases the certificate. Someone issues the invoice. Someone pulls the report.

Most of that coordination is manual, and most of it doesn't need to be.

Joblogic is building toward an Agentic Operating System (AOS) for service contractors: a connected operating layer that anticipates gaps, coordinates across teams, and handles routine decisions so your people can focus on the ones that require judgement.

"FSM was built to record what your team already did. AOS is built to coordinate what they do next."

Learn more at *joblogic.ai*

1.

Contract-native, by design

SLA tiers, scope rules, rate cards, and chargeability run as first-class inputs the system reads on every job - not data your team reconciles after the fact.

2.

Compliance, woven in

Engineer credentials checked before dispatch. Sign-off blocked without the right evidence. The audit pack assembled as work happens, not the week before the auditor arrives.

3.

Built for human judgement

The system runs the systematic. Your team stays in command of the judgement, the customer, and the exceptions. Accountability remains where it belongs.

Who we serve

Made for the trades that keep things running.

More than 7,000 service businesses trust Joblogic to run their operations, supporting over 45,000+ engineers across the UK. From small independent contractors to large national enterprises managing complex, multi-site operations.

"We've grown from £5 million to £20 million, and Joblogic has scaled with us the whole way. It's never held us back."

Ian Marriott
Managing Director
Accent Services

Plumbing & drainage

Handle reactive callouts and planned maintenance without losing track of engineers, jobs, or completion records.

Electrical contractors

Quote, track, certify, and invoice, all in one place. No chasing, no missing documentation.

HVAC & mechanical

Complex PPM schedules, F-Gas compliance, and multi-site assets without the admin overhead.

Lifts & elevators

Full asset registers, compliance records, and engineer coordination. Never miss a statutory inspection.

Fire & security

Schedule inspections, generate certificates, and maintain compliance records without the paperwork burden.

Property maintenance

High volumes of reactive repairs with full job visibility, compliance tracking, and reporting.

Facilities management

Multi-trade, multi-site operations with full contract visibility, SLA tracking, and compliance in one place.

30+ Industries covered
