

Junior MVC developer in the UK

The Opportunity:

An exciting opportunity to work in a fast-paced development team bringing new technology and solutions to a rapidly evolving business.

As a junior developer you will possess a strong desire to learn and broaden your skills and experience.

The successful candidate will be working with the following technologies:

- JavaScript frontend technologies, such as Knockout and Vue.js, C#, MVC
- Understanding of database technologies – MS SQL
- Agile development
- Unit testing (TDD)
- Working with and building web APIs

Skills Required:

- Strong analysis and problem-solving skill
- Excellent communication skills
- Ability to manage your own workload and work to deadlines
- Ideally you will be a graduate with a bachelor's degree in computer science or related field.
